

Step-by-Step Instructions for Utilizing a Verizon Mobile Hotspot

1. Power on the mobile hotspot device by pressing the power button on top. If the device doesn't start, plug in the power cable.

2. Wait for the device to retrieve data usage and information.

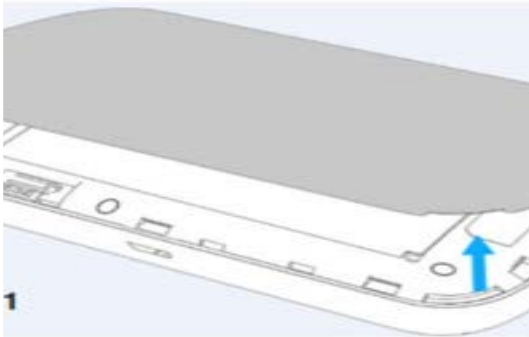

3. To find the WiFi password: press the menu button on the side of the device twice, then press the power button. The WiFi name will be at the top and password will be displayed at the bottom, next to the lock icon.

4. You can connect to the mobile hotspot via WiFi by selecting the WiFi network name and entering the password. Usually the WiFi name will be "Verizon-RC###", each device is a bit different.

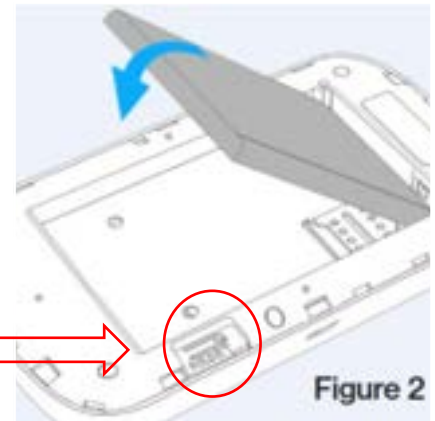

5. Alternatively, you can connect your device to the mobile hotspot using the charging cable provided.

6. If you encounter any issues with the hotspot, remove the back cover of the device.

7. Locate the small reset button and hold it down for a few seconds to reset the device.

8. If the device still doesn't function correctly, locate the IMEI number directly under the battery or in the "Device Info" menu and please call our customer service line for further assistance - 916.221.0855
